The rocky shoreline of the Similkameen River at Stemwinder Provincial Park is a popular fishing spot and a great place to cool your feet on a hot summer day.

Poison Ivy!
 Watch for poison ivy along the trails and roadsides. It may grow as a low shrub or a climbing vine. In summer it has bright green glossy leaves that grow in clusters of three. In the fall they turn red before they drop off leaving bare twigs with white berries. **Do not touch!**
